ASPHALT TECHNOLOGY

# READY TO PAVE THE FUTURE

# GUARANTEED TO WORK IN WET WEATHER

- † Thermally Resilient
- † Works in Water & All Weather
- † Bonds to Asphalt & Concrete
- † Instantly Traffic Ready
- † "Throw & Go" Approved
- † Stockpiles for Months
- † No Mixing, No Tack
- † Performance Approved

# RETHINK YOUR ASPHALT

EZ Street is a technologically advanced, all-temperature asphalt. It's ready to go right out of the bag, or off the stockpile, without heat, or any special treatment.

# HOW IT WORKS

## Sweep

Sweep out loose debris, dust, rocks—if it's not fixed to the road, your patch won't be either. (Water can stay.)

## Fill

Fill the pothole to 25 mm above the surrounding surface. For craters deeper than 100 mm, apply EZ Street in two inch lifts, compacting each layer before applying the next.

## Compact

Shovels work. Tamps are good too. But the easiest method is simply driving over the repair a few times, until it's just about level with the road. Traffic will provide secondary compaction.

Scan the QR Code to follow our EZ demonstrations on how to apply EZ Street
